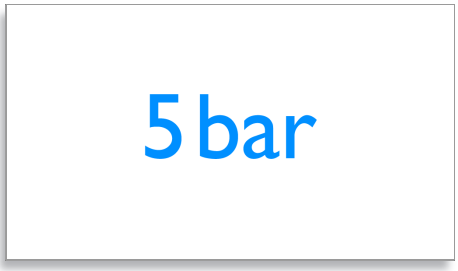
Highlights

Auto Calc-Clean function

The Auto Calc-Clean function automatically cleans your ironing system of scale. A two-minute scale removal cycle is activated automatically when it is time to clean your system. All you have to do is empty the detachable rinse tank. It keeps your system as new and powerful as the day you bought it.

Up to 5 bars of steam pressure



Double your ironing speed with pressurised steam. Pressurised steam penetrates deep into fabrics, making your ironing fast and easy, even on difficult fabrics.

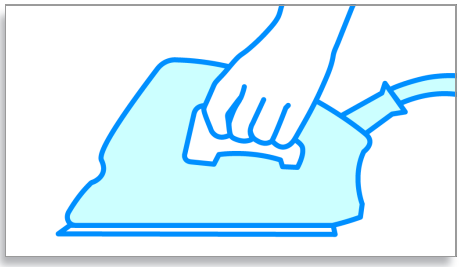
Continuous steam up to 120 g/m

Continuous steam output up to 120 g/min thanks to the small amounts of water that are pumped into the boiler each time. For perfect and fast crease removal.

Automatic cord winder

Thanks to the automatic cord winder, you can just press the button to automatically retract the power cord.

Ergonomic iron



The ergonomic design of the iron facilitates comfortable ironing by putting less strain on the wrist. The upwardly sloping handle ensures a natural position reducing strain during ironing. The iron design also prevents the repetitive movements caused by placing an iron on its heel. The iron is light (1.2 kg) for an easy and comfortable ironing experience.

Steam boost up to 200 g/min

Steam boost enables you to easily remove even the most stubborn creases.

SteamGlide soleplate

SteamGlide soleplate is the best Philips soleplate. It has great scratch resistance, excellent gliding and is easy to clean.

Eco-setting

Save 20% energy and 40% water consumption by selecting the eco-setting. The eco-setting offers the most energy efficient way to obtain perfect ironing results.

Specifications
